

Fellowship

Description

Bridge Fellowship

The Fellowship Program was the first initiative of Bridge Budapest. Through the five years of the program 30 ambitious, young fellows joined us who spent their intern period in innovative, Hungarian-founded successful companies such as Prezi, IBM Budapest Lab (formerly known as Ustream), LogMeIn, BOOKR Kids, Synetiq, Konetik or Publishdrive.

In the first three years, our fellows could spend a month in the foreign offices of successful Hungarian-based startups where they were able to gather first-hand experience in how a company really operates. Between 2016 and 2017 we were able to partner up with twelve smaller startups where our fellows spent six months working on a high business impact tasks to gain real work experience. There are several young talents who are still with the same company, furthermore some of them received stakes in their companies. This was our Fellowship Program. If you would like to see more about it, then head over to our [Vimeo-channel](#) where you can find the final summary videos of our fellows.
